WORKING EXPERIENCE

SALVIA

Full stack developer | December 2024 - Present

- Built and deployed full-stack web applications with Next.js and MERN stack.
- Developed a fish factory management system to handle reception, wrapping, shipping, and traceability of fish stock.
- Built [CountryIP.com](#), a public IP lookup tool providing location and country details such as languages via a public API.

PROJECTS

Fish Management System | Next.js, Prisma

Developed a comprehensive web application to manage fish factory operations, including reception, wrapping, shipping, and traceability. Implemented real-time dashboards and detailed category statistics to optimize workflow.

CountryIP.com | MERN Stack

Created a public IP lookup platform offering detailed location and country information such as languages, flags, and currency via a RESTful API. Optimized for performance and scalability.

ABXGroup.ma | Next.js

Built a responsive and SEO-optimized corporate website for ABX Group, a top Moroccan seafood exporter, improving their digital presence and client engagement.
